6 Foot Tall Cotton!!!!

MagnumGro Ultra can achieve the same results for deer food plots as well as agricultural crops.

The added plus is that MagnumGro Ultra is organic and improves the soil each year, unlike commercial fertilizers.

MagnumGro Ultra is our Premier Bio-Soil Amendment product.

This photo was taken by Burney Morgan, President of Bio-Game Solutions (a division of Bio-Soil) on August 3, 2007 at the R & D Center for Bio-Soil Solutions. "Are we breaking records? Maybe, maybe not, but we are indeed very proud of our 6 foot cotton", says Burney.

Pictured above is Wayne Wade, President of Bio-Soil, LLC standing 6'4 and looking mighty short next to these beautiful cotton plants. He quotes, "It's just simply amazing. We knew we had a great line of products, but we sure didn't expect this kind of outcome."
